Accelerated JavaScript
April 2019

Accelerated Web Development
January - February 2019

VOLUNTEER EXPERIENCE

Juno College of Technology
Web Development & JavaScript Mentor

Canada Learning Code
Mentor and Instructor

ABOUT

I'm a Front-End Developer with entrepreneurial spirit, self-motivation, and strong leadership abilities. I love nothing more than working on complex problems, and I am always working towards my next big educational hurdle.

WORK EXPERIENCE

Grey Canada (October 2019 - Present)
Front-End Developer

At Grey I work as the only developer working on a variety of client projects including landing pages and animated banner ads. As the only developer my time is largely self-driven, and I am responsible for seeing through every project from conception to completion.

Juno College of Technology (July 2019 - Present)
Instructor/Developer

First hired on a three month contract immediately following the Web Development Immersive Program, I quickly stepped into an Instructor/Developer role as a Lead Instructor and mentor in the Accelerated HTML/CSS and JavaScript courses. In addition I was responsible for maintaining and updating course material and building additional exercises.

Since starting my full-time position at Grey, I have moved into a part-time role as Lead Instructor of the JavaScript course on weekends.

SKILLS

HTML	JavaScript	Git
CSS	JQuery	Github
SCSS	React.js	Node.js
Responsive Design	Firebase	Express
Visual Studio Code	RESTful API's	MongoDB
